

Lê Trương Công Hiếu

Software Engineer Intern

☎ 0963552927 ✉ lch3504@gmail.com ⓘ <https://www.linkedin.com/in/letruongconghieu/> 🔗 <https://github.com/lchieu>

📍 106/10 Tran Thi Trong, Tan Binh District, Ho Chi Minh City

OBJECTIVES

I am a responsible, sociable, and proactive individual, always ready to learn new knowledge. I am currently a final-year student awaiting my graduation degree. Through several academic projects, I have gained experience in teamwork and specialized knowledge in back-end development. I have also completed a 3-month internship, where I gained valuable experience in a real-world work environment. In the next 1-3 years, my goal is to become a professional Back-End Developer, proficient in building complex data management systems and effectively optimizing processing performance.

EDUCATION

Ho Chi Minh City University of Industry and Trade 09/2022 - Present

Information Technology

- GPA: 3.46
- Received scholarships for 4 semesters

SKILLS

Programing:	Java, C#, C, SQL, Python, Typescript, JavaScript,
Framework	Spring Boot, ASP.NET, React/TS.
Database	SQL Server, MySQL, MongoDB.
Tools & Service:	Git, Github, VSCode, IntelliJ, AWS, Azure, Postman.
Languages:	English (Intermediate)

PROJECT

Real-time Chat Application 04/2025 - 06/2025

2 members

- **Description:** A messaging platform allowing multiple users to exchange instant messages, supporting both 1-on-1 and group conversations.
- **Tech Stack:** Java Spring Boot, WebSocket, SQL Server, HTML/CSS, JavaScript.
- **Responsibilities:**
 - Designed and implemented optimized SQL Server database schemas to ensure data integrity and enhance system performance.
 - Creating RESTful APIs for user management and integrating WebSocket for low-latency real-time messaging.
- **Github:** <https://github.com/lchieu/realtime-chat-app>

Language Center Management Application 09/2025 - 11/2025

1 member

- **Description:** A comprehensive management system comprising a Student Portal (course discovery, roadmap tracking) and an Administrative Dashboard (HR, scheduling, attendance, and revenue statistics).
- **Tech Stack:** React (TypeScript), Material UI.
- **Key Features & Deployment:** Integrated VNPay online payment gateway; managed system deployment across Vercel (Frontend) and Azure (Backend).
- **Student Portal Demo:** <https://quan-ly-trung-tam-ngoai-ngu.vercel.app/>

- **Administrative Dashboard Demo:** <https://quan-ly-trung-tam-ngoai-ngu-admin.vercel.app/>

WORK EXPERIENCE

SAI GON LAB JOINT STOCK COMPANY

07/2025 - 09/2025

Intern

- **Research & Analysis:** Conducted in-depth research on IP-based and IoT smart broadcasting architectures (SPA) to modernize information infrastructure for Smart City initiatives.
 - **System Configuration:** Performed firmware updates and optimized network parameters for 4G/WiFi L300 devices. Configured automated broadcasting schedules and centralized digital content management.
 - **Quality Assurance:** Developed and executed comprehensive Test Cases across Web and Mobile platforms. Monitored hardware performance (CPU, RAM, Bandwidth) and provided remote troubleshooting via AnyDesk.
-
